

System Development and Project Organization (BSUP)

*Paolo Tell*

# Course Introduction

# About us

- Paolo Tell
  - Postdoctoral researcher (ITU)
  - Global Software Engineering, Computer-Supported Cooperative Work, Software Architecture
- Teaching Assistants
  - Alan N. Z. Andersen
  - Cecilie Strunge Jensen
  - Tue Odd Langhoff

# About you?

- Who of you is practicing Scrum outside of the university?

# About you?

- Who is taking the “Second Year Project” with Jesper?

# About you?

- Have you already formed project groups?

# The Goals of BSUP

The main objectives of this course are:

- to understand the role of a software project manager,
- to understand and learn how to use a variety of methods and techniques for systems development and project management,
- to understand the different key characteristics of a software project and to be able to critically reflect on which project model better fits such characteristics,
- to understand and be able to reflect on the different challenges related to managing distributed software development projects,
- to apply Scrum techniques and methods of project management on a small project.

# Books and Literature

- Course Book
  - Software Project Management, 5th edition.  
Bob Hughes, Mike Cotterell.
- Additional Literature
  - relevant research articles and readings will be provided weekly.

# This is NOT (only) a theoretical course!

- Lectures
  - Friday 9:00 - 14:00 [2A52]
  - Rather “theoretical” in places
  - Keep up reading
- Exercise sessions
  - Mostly exercises will be done throughout the lectures, not during the exercise slots
  - Additional assignments will be suggested, but will not be mandatory
- Mandatory assignments
  - Dropped
- Project
  - A report documenting and reflecting on the management of the second year project
  - Same groups where possible (i.e., 6 people)
  - Deadline: 20th of May
- Exam
  - June 14-17 2016
  - Oral, w. no preparation, 20 min.

# The Lecture Topics

- I part
  - Agile, in particular Scrum. This will provide you the base to manage the 2nd year project that will start in March
- II part
  - Traditional software project management
- III part
  - Distributed software project management

# ... what else?!

- Most material and information will be made available on the web site
  - <https://learnit.itu.dk/course/view.php?id=3005306>
- REMEMBER
  - Use the web/blog/discussion – not email!
  - Check the web site for changes/posts
- Calendar
  - Week 12 and 16 there is no lecture due to holidays
- External guests
  - We will have 2 external guests towards the end of the course
