A message from stupIT

MP2

- Good!

- Time consumption a bit *low*.

- Still issues with concurrency.

- Closed connections generally handled only through exceptions.

- You likely did not implement a (HTTP-based, WS-* compliant) web-service.

- Failure model is more than considering central-server crashes.

```
synchronized (server.getSinks()) {
    for(Socket s : server.getSinks()) {
        try{
            send(message, s.getOutputStream());
        } catch (IOException sinkDeadException) {
            deadSinks.add(s);
        }
    }
}

deadSinks.forEach(server::removeSink);
```

Synchronisation errors
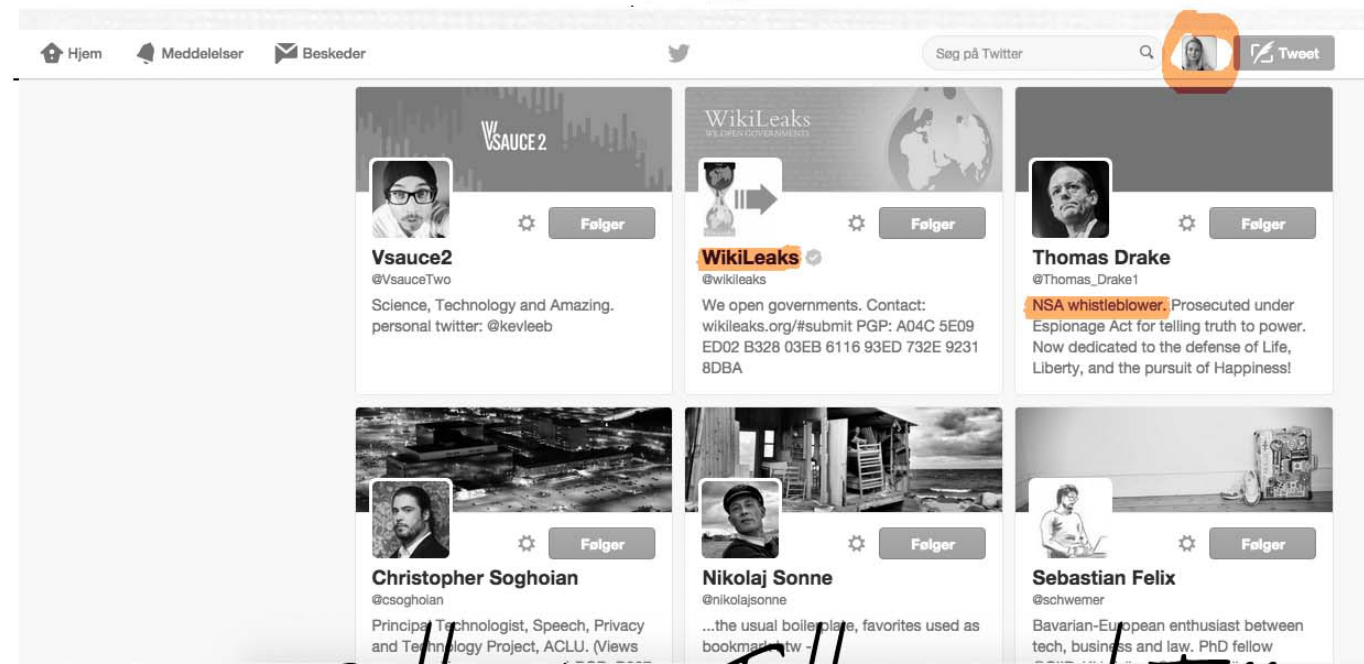

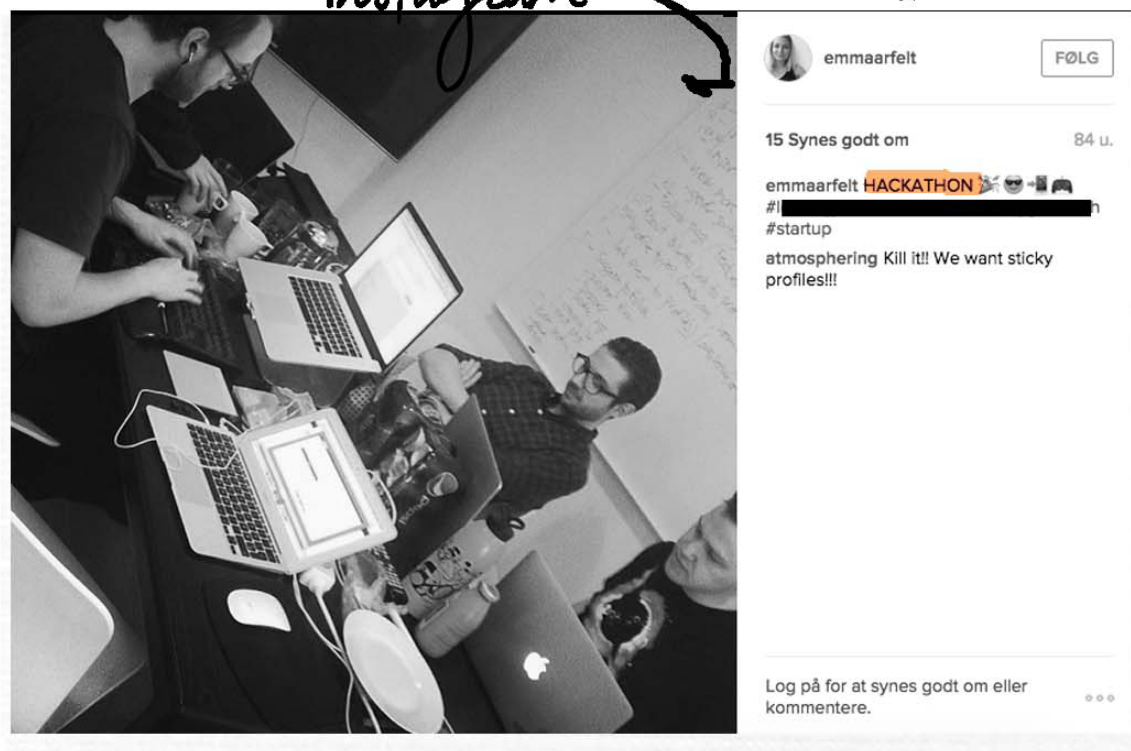

You'll find this only under load.

ITU Evaluations

- Please fill-in the ITU evaluations!

- They are important to me, to you, and to MDS 2016 students.

"Security" Ritter Sport Competition Winners:

Emma Arfelt Kock
Mathies Wiencke

Evidence that subject is involved and engaging with the WikiLwaks and hacker environment (E3028)
